EDUCATION

San Jose State University

Bachelor of Science in Computer Science and Linguistics

San Jose, CA

May 2027

EXPERIENCE

Burnt (YC S25)

July 2025 – September 2025

Full Stack Developer Intern

San Francisco, CA

- Shipped multi-channel AI order agent (webhooks, WhatsApp, email, phone) with Claude Sonnet and RAG, translating ambiguous ops requirements with no complete spec into production across 7 enterprise clients
- Built automated output-validation and human-in-the-loop QA layer to catch LLM failure modes; iterated on prompts and added vector-store correction memory, raising precision across 1,000+ production orders
- Shipped Python and React internal tools for non-technical ops staff: Intercom ticketing (5+ min saved per request, 50+ customers), ERP sales order interface, and AWS S3 attachment store for 250+ files

SJSU College of Engineering

June 2025 – August 2025

Software Engineering Intern

San Jose, CA

- Built Python wrapper around Grafanalib on a 3-person team, achieving 83% code reduction (30+ lines to 5)
- Migrated 7+ legacy dashboards across 3 active Grafana environments with unit tests on the dashboard layer

SJSU Software & Computer Engineering Society

February 2025 – Present

Software Engineering Intern

San Jose, CA

- Building professor review platform for 30,000+ SJSU students on 12-person team (React, Node.js, Drizzle ORM)
- Shipped review submission flow and a Python GraphQL webscraper for course data ingestion across agile sprints

PROJECTS

Cold Leads Agent | FastAPI, Claude Haiku + Sonnet, Cal.com, Linq, Postgres

May 2026 – Present

- Built and deployed an autonomous lead-qualification SMS agent for a Bay Area real estate client: FSM-driven pipeline with intent classification, debounce sweeper, and Cal.com auto-booking of qualified leads
- Dual-model Claude pipeline (Haiku 4.5 for intent classification and reply drafting, Sonnet 4.5 for nuanced replies); HMAC-signed Linq webhooks, async Postgres on asyncpg, APScheduler cadence runner
- Live in production: auto-books qualified leads on Cal.com and saves ~5 hrs/week of manual outreach

Sleep-PSG Scoring | FastAPI, MNE, Scikit-Learn, Redis, React, WebSockets

January 2026 – April 2026

- Built automated PSG sleep-stage scoring platform with 98% time reduction (2+ hrs to under 2 min) and 83% balanced accuracy, validated against clinician-labeled hypnograms from the Sleep-EDF dataset
- Async EEG pipeline (Redis + ARQ): distributed EDF parsing, spectral features, Scikit-Learn classifiers per patient
- Sub-10ms WebSocket streaming to React dashboard rendering live EEG waveforms and hypnograms for QA review

Internship Matcher | FastAPI, Claude Haiku + Sonnet 4.5, Redis, PostgreSQL, AWS S3

October 2025 – Present

- Shipped to production at internshipmatcher.com: Python ingestion pipeline scrapes 1,000+ listings daily across SimplifyJobs source with 3-tier cache (Redis, DB, in-memory) for 90% retrieval reduction
- Designed dual-model Claude pipeline (Haiku 4.5 for fast skill extraction, Sonnet 4.5 for deep re-ranking top 30 to top 10) at 95%+ accuracy; iterated on prompts to fix failure modes (Java vs. JavaScript)
- Parallel processing 30+ positions, 52% latency reduction (270s to 130s) via dynamic batching and prompt caching

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Java

AI Tools: Anthropic/OpenAI/Gemini API, LangChain, RAG, Prompt Engineering, Vector Stores, Playwright, MCP

Frameworks: FastAPI, Flask, React.js, Node.js, Tailwind CSS, Spring Boot

Developer Tools: Git, Docker, Redis, AWS (EC2/S3), GCP, PostgreSQL, SQLite, Linux, Scikit-Learn, NumPy

Coursework: DSA, Discrete Math, Linear Algebra, Advanced Prob & Stats, ML, OOP
